

‘Magnus’ - Antistatic Nordic style coverall for the serious Oil & Gas worker.

Product code: F317

STANDARDS EXCEEDED

ISO11612:2008 A1 | B1 | C1

This garment provides protection against heat for industrial workers in accordance with the above standard and protects at the specified levels - it is not designed to protect against molten metal splash.

EN1149-5:2008

This garment has electrostatic dissipative properties to avoid incendiary discharges – in accordance with the above standard – it is not designed to protect against electric shock from mains voltages

PRODUCT DESCRIPTION

This flame retardant and antistatic coverall is the ultimate garment for your protection and safety in the harsh offshore environment. The extremely durable fabric with and robust zips and fitments ensure you are protected day in day out. Couple this with multiple pockets, well-proportioned fit, high-visibility tape, quality brass zippers and the ORKA Magnus coverall is your first choice!

Protection – **Exceeding EN standards** - For peace of mind & protection of life.

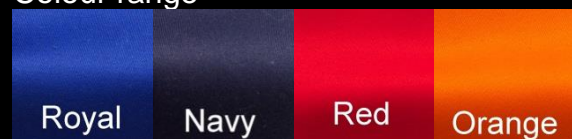

Comfort – **Tailored Fit** - Can frustrated workers operate safely? Our coveralls reduce body stress & increase productivity.

Durability – **Low shrinkage & tough construction** – This makes our coveralls a long term option (holes in garments never were safe)
