

**‘Tropic’** - Lightweight Nordic style coverall for flame protection in extreme heat.

Product code: F421

### STANDARDS EXCEEDED

ISO11612:2008 A1 | B1 | C1

This garment provides protection against heat for industrial workers in accordance with the above standard and protects at the specified levels - it is not designed to protect against molten metal splash.

### PRODUCT DESCRIPTION

The ORKA Tropic coverall is specially designed to give the best protection with unrivalled comfort in tropical conditions and extreme heat. The extremely durable yet lightweight fabric protects yet allows the body to breathe reducing the humidity accumulation on the inside of the garment. The Tropic has all the same features of its heavier stable mate Magnus coverall including – Multiple pockets, tailored fit, quality Hi Viz tape and quality YKK brass zippers, all features that make this Tropic coverall an essential part of your protection in warm climates.

**Protection** – **Exceeding EN standards** - For peace of mind & protection of life.

**Comfort** – **Tailored Fit** - Can frustrated workers operate safely? Our coveralls reduce body stress & increase productivity.

**Durability** – **Low shrinkage & tough construction** – This makes our coveralls a long term option (holes in garments never were safe)
